

Data Security Compliance

Enabling You to Comply with Data Regulations

As a business you may be subject to regulations that govern how you protect sensitive data. Failure to comply with any one of these regulations can often lead to serious fines and ramifications. We're here to help.

SecureStor takes compliance seriously. That's why we have taken steps to ensure that our software abides by the strictest security controls required by major industry and federal regulations. See how we enable you to satisfy all major compliance regulations and keep your data safe.

HIPAA

Requires the protection of confidentiality and security of healthcare information

How we comply:

- Military-grade data encryption in transit and at rest
- Redundant secure data centers
- Password protected access to backups

FERPA

Requires the protection of confidentiality and security of educational records

How we comply:

- Military-grade data encryption in transit and at rest
- Redundant secure data centers
- Password protected access to backups

FINRA

Dedicated to investor protection and market integrity through effective and efficient regulation of the securities industry

How we comply:

- Features such as built-in access controls and audit logs
- FINRA-compliant data infrastructure

PCI

Payment Card Industry Data Security standard for protecting credit cardholder data

How we comply:

- Software does not store full track or magnetic stripe data
- Encrypt data in transit and at rest
- Access controls to prevent unauthorized access to data

Safe Harbor

Prohibits personal data transfer to non-European Union countries that do not meet EU standards for adequate data protection

How we comply:

- Meet EU adequacy standards
- Partners can receive and process personal data from the EU and Switzerland

ABOUT XFINIGENT SOLUTIONS

When you choose us as your Business Partner you're choosing a company that REALLY understands not just how to implement effective IT strategies, but one that also knows what makes small businesses succeed.
